DETAILED ACTION

1. Claims 12-16,18-25,29,31,37,43,44,47,53,54,59-62 have been canceled.
2. Claims 1-11,17,26-28,30,32-36,38-42,45,46,48-52,55-58 are pending. Drawings filed accepted.
3. Priority documents have been received.

Election/Restrictions

4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,26,28 (in part), drawn to compounds, compositions, method of use where $n=0$; B/C are Y(Z).

Group II, claim(s) 1,26,28 (in part), drawn to compounds, compositions, method of use where $n=0$; B/C form ring.

Group III, claim(s) 1,2,17,26-28,55-58 (in part), drawn to compounds, compositions, method of making, method of using where $n=1$; B/C are Y(Z).

Group IV, claim(s) 1,3-11,17,26-28, 55-58, (in part) drawn to compounds, compositions, method of making, method of using where $n=1$; B/C form ring.

Group V, claim(s) 1,26,28, (in part) drawn to compounds, compositions, method of using where $n=2$; B/C are Y(Z).

Group VI, claim(s) 1,26,28 (in part), drawn to compounds, compositions, method of using where $n=2$; B/C form ring.

Group VII, claim(s) 1,26,28 (in part), drawn to compounds, compositions, method of using not included in above groups. If elected this group may be subject to further restriction.

Group VIII, claim(s) 30,32,33-36,38-42,45,46,48-52, drawn to additional method of using compounds. If elected this group may be further restricted.

Art Unit: 1625

5. The inventions listed as Groups I - VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain a tricyclic ring system with shared ring nitrogen or a pentacyclic ring with shared ring nitrogen which does not define a contribution over the prior art. The substituents on the structure vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper.

Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.

6. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

Art Unit: 1625

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
